

Enriching On-line Problem Based Learning

Date: August 25, 2020 (Tuesday)

Time: 5:30 pm – 6:30 pm

Zoom Webinar ID: 910 0385 9857

Registration: https://hku.zoom.us/webinar/register/WN_KsPrG6ISTlioluRXmco9Ww

The transition from the conventional face-to-face (F2F) to online problem-based learning is challenging to many. Although there are many similarities to F2F delivery, online teaching requires an integration of creativity and innovation to optimize the affordances of technology in achieving the learning outcomes. In this webinar, the presenters will help share, based on their experiences, some tips and tricks in running online PBL classes without jeopardizing the learner engagement and learning experiences. Topics include:

- Revisiting the PBL principles;
- How to run online PBL tutorials effectively;
- How to enrich PBL online teaching; and
- The difficulties and challenges encountered.

Who should attend?

- Teachers who will be conducting PBL tutorials in upcoming semesters;
- Those who are interested in enriching their on-line teaching.

Speakers:

Dr Jessica Chu
Lecturer
School of Biomedical Sciences

Dr Fred Ganotice
Senior Lecturer
BIMHSE

Dr Kendrick Shih
Clinical Assistant Professor
Department of Ophthalmology

Dr George Tipoe
Director, BIMHSE
Assistant Dean (Enrichment Year)

Mr Francis Tsoi
Senior Technical Officer
BIMHSE
